Who are we?

We are a **German-based company** headquartered in Central Slovakia (Banská Bystrica) and active in the CEE region.

Our customers are leading **automotive producers**, as well as their **suppliers** and **investors**.

As an **engineering supplier** and **production partner**, we provide clients with comprehensive support and solutions for building a **new plant** or **expanding production**.

We offer the development of systems and components, and project implementation through our **experienced executive managers**.

Our experts also directly enter the production process and **participate** in improving **manufacturing processes**.

The Wesconi team's experts aim to deliver the **operational roll-out** of projects from early stages to **successful implementation** and fully-functioning companies. Hence our slogan:

**„From Greenfield to
Business Excellence“**

Spheres of Activity

Our Specializations

Consulting

Defining a strategic approach for customer development. Evaluation of innovation potential, including measures for change or transformation. Readiness for new technologies and potential for growth. Analysis and initial audit of current company status, defining scope of operational areas and setting steps for improvement.

Interim Management

Our experts directly roll-out projects as interim managers – an external professional brings a new perspective and problem-solving capability and capacity. Our experts work in leadership positions across various company departments: C-Level, Supervisory Board, Plant Management, Finance, Quality, Production, IT, Supply Chain, HR, and Industrial Engineering.

Engineering

Our experts offer the highest-standard development services, overseeing the conception, technical design, simulation and documentation of your production systems and components. The combination of German engineering know-how, deep understanding of processes, and internationally-experienced experts guarantee effective solutions that are both fast and cost-effective.

Wesconi typical projects

Greenfield & Brownfield Projects
Start-up of new plants
Ramp-up of production

Performance Improvement e. g. Bottleneck- or LEAN
Management
Supplier development

Engineering Chassis & Powertrain
Plant development
Industry 4.0
Optimization of components

Change & Transformation of Organizations
Crisis Management
Restructuring
E – mobility
